

APPROVED FIRE PIT GUIDELINES

- Campfire must be contained within a pit 18 inches deep into mineral soil, absent of roots or any other organic material or a solid ring made of non combustible material that is at least 18 inches in height that will contain the fuel wood or coals while shielding the ashes from being blown by the wind.
- Maintain 18 inch depth of the pit by removing build up ash and other materials; assure disposed materials are completely extinguished. Do not dump hot ashes into dumpsters.
- Camp Fires must be at least 15 feet away from any combustible vegetation or structures, vertically and horizontally. Fire resistant vegetation as part of the landscaping is excluded.
- Six feet around the fire pit must be cleared to mineral soil.
- Six inches of gravel must be under the fire pit bringing the depth to 24 inches.
- One person 18 years or older must attend the fire at all times.
- Ten gallons of water or more must be dedicated and immediately available on site for fire suppression.
- At least one standard sized shovel must be dedicated and immediately available on site for fire suppression.
- Camp Fires must be completely extinguished, **cold to the touch**, when not attended. (Code 76-6-404.5).
- Persons responsible for escaped or unattended camp fires are subject to prosecution and suppression costs. (Code 76-6-104.5)
- **Camp Fires within the Cedar Mountain Fire Protection District must have an approved Fire Pit Permit document on Premises.**
